

Jordan Lee

Junior Data Analyst

Email: jlee.analyst@email.com | Phone: (555) 014-9988 | Location: Austin, TX | GitHub: github.com/jlee-analyst

Professional Summary

Ambitious, data-driven Junior Data Analyst possessing solid foundations in exploratory data analysis (EDA), predictive statistical mechanics, and automated dashboard delivery. Proven capability to scrape, transform, and map disparate business tables into high-impact interactive visualizations.

Technical Skills

Python (Matplotlib, Seaborn, Pandas), SQL (MySQL), Microsoft Power BI, Google Looker Studio, Advanced MS Excel, Git/Version Control, Statistical Hypotheses Testing

Professional Experience

Data Analyst Intern | Innovate Tech Labs Summer 2025

- Parsed, formatted, and consolidated historical application tracking data arrays using MySQL, correcting over 12,000 duplicate lead entries.
- Deployed dynamic visualization boards utilizing Google Looker Studio to track user engagement trends during active product releases.
- Conducted extensive structured testing on customer onboarding workflows to isolate user experience drop-off zones.

Key Projects

E-Commerce Interactive Revenue Engine

Extracted raw consumer transaction pools utilizing Python APIs, executed thorough formatting pipelines via Pandas, and generated complex multi-tab performance reporting modules inside Power BI.

Real Estate Predictive Pricing Grid

Constructed an open-source multivariable linear pricing matrix evaluating regional urban demographic clusters to forecast property rental shifts.

Education

B.S. in Business Analytics - University of Texas at Austin

2025
