Professional Summary

Detail-oriented Data Analyst with over 4 years of experience translating complex datasets into actionable financial and operational insights. Proficient in designing automated BI dashboards, engineering ETL pipelines, and delivering advanced SQL queries to optimize business workflows and scale executive data visibility.

Technical Skills

SQL (PostgreSQL, T-SQL), Python (Pandas, NumPy, Scikit-Learn), Tableau, Power BI, Excel (VBA, Advanced Modeling), ETL Pipelines, A/B Testing, Data Warehousing (Snowflake)

Professional Experience

Senior Data Analyst | Apex Global Solutions 2024 - Present

- Architected automated regional performance dashboards in Tableau, decreasing executive cross-departmental reporting times by 40%.
- Engineered structural SQL queries and automated ETL processes inside Snowflake to clean and process over 5 million operational records daily.
- Collaborated with cross-functional marketing squads to establish an A/B testing framework that expanded user acquisition conversion by 14%.

Data Analyst | Vanguard Retail Corp 2022 - 2024

- Managed weekly supply chain lifecycle metrics using Power BI, identifying critical workflow bottlenecks to reclaim \$85K in annualized storage spend.
- Developed comprehensive Python automation routines to substitute historical manual cleaning workflows, cutting script error overhead by 25%.
- Delivered statistical data deep-dives to product leaders to map long-tail seasonal user attrition trends.

Key Projects

Predictive Customer Churn Ecosystem

Designed an internal Python predictive module implementing logistic regression pipelines to highlight at-risk enterprise accounts with 88% model validation precision.

Education

B.S. in Statistics & Data Science - University of Illinois

2022
