PROFESSIONAL SUMMARY

Performance-driven **Software Engineer** with proven experience designing, developing, and maintaining scalable backend architectures. Adept at transforming business and user requirements into highly efficient, maintainable codebases. Full lifecycle developer with deep strengths in cross-functional team collaboration, Agile/Scrum delivery frameworks, and system optimization.

TECHNICAL ECOSYSTEM MATRIX

Core Languages:	Python, Java, C++, Go, SQL
Frameworks & Tools:	Spring Boot, Django, FastAPI, Git, Docker, Kubernetes
Architecture & Testing:	REST APIs, Microservices, Data Structures, JUnit, PyTest
Methodologies:	Agile, Scrum, Kanban, Code Reviews, Continuous Integration

PROFESSIONAL EXPERIENCE

Software Engineer | TechCorp Solutions

June 2024 – Present

- Analyze user requirements and technical specifications to architect end-to-end cloud-based solutions meeting strict business KPIs.
- Write clean, maintainable, and highly efficient code in Python and Java, boosting core application performance metrics by 25%.
- Collaborate directly with product managers, UX/UI designers, and external stakeholders to scope and prioritize roadmap sprints.
- Lead rigorous code reviews, automated unit testing frameworks, and debugging pipelines to guarantee application security and platform reliability.
- Document technical software designs, complex API interfaces, and system dependencies to foster cross-team knowledge sharing.

Associate Software Developer | Innovate Web Systems

September 2022 – May 2024

- Participated actively in Agile/Scrum development methodologies to deliver production-ready software increments in rapid timelines.
- Supported and maintained enterprise legacy software applications by swiftly troubleshooting critical production runtime errors and releasing hotfixes.
- Partnered with cross-functional infrastructure squads to build out flawless service integration and microservice interoperability.
- Utilized version control systems (Git) to safely coordinate deployment branches, slashing merge conflicts across distributed engineering pipelines.

EDUCATION & FOUNDATIONS

Bachelor of Science in Computer Science
Nexus State University

Graduated: May 2022
GPA: 3.8/4.0
