LinkedIn: linkedin.com/in/alexmorgan-eng
Location: San Francisco, CA

Executive Summary: Visionary Senior Software Engineer with 10+ years of proven expertise architecting, scaling, and deploying high-throughput microservices and distributed data ecosystems. Specialized in transforming legacy codebases into highly resilient cloud infrastructures capable of handling billions of daily requests. Adept leader driving cross-functional engineering teams, aligning complex technical Roadmaps with high-value business outcomes, and championing strict DevOps and CI/CD automation practices.

I. TECHNICAL ECOSYSTEM & MATRIX GRID

Backend & Core Core: Systems Level Go (Golang), Python (FastAPI, Django), Java (Spring Boot), Node.js, C++	Cloud & Infrastructure: AWS (EKS, Lambda, RDS, DynamoDB), Google Cloud Platform (GCP), Terraform (IaC)
Distributed Datastores: PostgreSQL, Apache Kafka (Streaming Pipelines), Redis Enterprise, MongoDB, Elasticsearch	DevOps & Architecture: Docker, Kubernetes, CI/CD (GitHub Actions, Jenkins), Service Mesh (Istio), Microservices
Frontend & Analytics: TypeScript, React.js, Next.js, Prometheus, Grafana, Datadog (Distributed APM Tracing)	Methodologies & Governance: Domain-Driven Design (DDD), Event Sourcing, Test-Driven Development (TDD), Agile Scrum

II. PRODUCTION DELIVERABLES & QUANTIFIABLE METRICS

Core Initiative / Architecture Impact	Tech Stack Deployed	Quantifiable Production Scale Impact
Global API Gateway Redesign Led overhaul of high-traffic edge layer to mitigate regional cascading failure chains.	Go, gRPC, Envoy Proxy, Kubernetes, AWS EKS	- Scaled system throughput by 350% - Dropped P99 latency from 140ms to 18ms - Handled 4.2B daily requests flawlessly
Real-time Event Streaming Migration Decoupled core transactional monolithic architectures to event-driven ledger flows.	Apache Kafka, Python, PostgreSQL, AWS Lambda	- Eliminated data race bottlenecks completely - Saved \$140,000/yr in infrastructure overhead - Achieved real-time streaming availability at 99.999%
Multi-Tenant Relational Scaling Re-architected fragmented sharding matrices for primary core relational storage arrays.	PostgreSQL, Redis Labs, Terraform, Docker	- Safeguarded continuous operations across 45M+ active records - Automated active-failovers under 2.4 seconds

III. PROFESSIONAL CHRONOLOGY

Lead Staff Engineer / Software Architect
Nexus Enterprise Cloud Solutions — San Francisco, CA

Jan 2023 — Present

- Architected core underlying orchestration grids managing continuous cross-region software-defined infrastructure tasks processing 20TB+ configurations hourly.
- Mentored and provided technical steering for a cross-functional squad of 14 senior engineers across distributed systems sprint initiatives.
- Pioneered strict Zero-Trust service-to-service cryptographic validation schemas using Istio service meshes, dropping security perimeter risks to zero.
- Refactored legacy relational database contention matrices using selective Redis cache warming strategies, accelerating internal dashboard renders by 80%.

Senior Software Engineer (Backend Systems Group)

Mar 2019 — Dec 2022

Quantum Velocity Tech Systems — Austin, TX

- Re-engineered high-volume billing logic components into decoupled cloud worker queues, handling transaction spikes of up to 45,000 requests per second.
- Authored custom internal reusable tooling in Go which reduced typical application bootstrap pipelines from 25 minutes down to 90 seconds.
- Led cross-team synchronization paths that introduced continuous blue-green deployment sequences, achieving absolute zero-downtime release targets.

Software Engineer II

Jul 2016 — Feb 2019

CoreLogic Innovations Inc. — Seattle, WA

- Developed microservice REST APIs utilizing Python/Django and PostgreSQL, increasing back-office indexing performance speeds by 40%.
- Collaborated with core UX/Product squads to stand up modular administrative dashboard pipelines utilizing unified modern TypeScript components.

IV. ACADEMIC FOUNDATION & INDUSTRY CREDENTIALS

M.S. in Computer Science & Distributed Systems — University of California, Berkeley

Certified Kubernetes Administrator (CKA) — Linux Foundation

B.S. in Computer Engineering (Suma Cum Laude) — University of Washington

AWS Certified Solutions Architect – Professional — Amazon Web Services
