

ALEX MERCER

San Francisco, CA | +1 (555) 019-2834 | alex.mercer@email.com | linkedin.com/in/alex-mercerc-tech

PROFESSIONAL SUMMARY

Forward-thinking Technical Architect with over 10 years of experience designing and deploying scalable, high-performance cloud infrastructure and microservices architectures. Adept at leading cross-functional engineering teams to transform complex business requirements into robust software solutions. Proven track record in reducing operational costs and modernizing legacy enterprise systems.

TECHNICAL SKILLS

Cloud & Platforms: AWS (EC2, Lambda, S3, RDS, EKS), Azure, OpenStack

Architecture Styles: Microservices, Event-Driven Architecture, SOA, Serverless, RESTful APIs

Languages & Frameworks: Java, Spring Boot, Python, Go, Node.js, C# .NET

DevOps & Tools: Docker, Kubernetes, Jenkins, Terraform, Git, Prometheus, Grafana

Databases & Caching: PostgreSQL, MongoDB, MySQL, Redis, Apache Kafka, Elasticsearch

PROFESSIONAL EXPERIENCE

Senior Technical Architect — Cloud Solutions Corp

2023 – Present

- Spearheaded the migration of a legacy monolithic e-commerce application to an AWS-backed microservices platform, improving scalability and reducing system latency by 35%.
- Architected an event-driven data processing pipeline using Apache Kafka and AWS Lambda that handles over 10M daily transactions seamlessly.
- Directed an agile team of 12 engineers, standardizing DevOps processes with Terraform and Kubernetes, cutting production deployment times by 40%.

Technical Architect — NextGen Innovations

2019 – 2023

- Designed multi-tenant SaaS application infrastructure hosting over 50 enterprise clients, achieving 99.99% uptime across production clusters.
- Standardized enterprise API frameworks and security protocols (OAuth2/OIDC), resulting in a 25% faster integration timeline for external partners.
- Mentored junior developers and led weekly technical architecture reviews to ensure alignment with global design patterns and zero critical regressions.

Lead Software Engineer — TechVanguard Solutions

2016 – 2019

- Developed robust core backend services utilizing Spring Boot and PostgreSQL, handling up to 5,000 concurrent requests per second.
- Implemented comprehensive automated CI/CD testing pipelines, which reduced deployment rollback occurrences by 60%.

EDUCATION

B.S. in Computer Science — State University

Graduated 2016

CERTIFICATIONS

AWS Certified Solutions Architect – Professional • TOGAF 9 Certified Practitioner • Certified Kubernetes Administrator (CKA)
