

Professional Profile

Results-driven Technical Program Manager with over 8 years of experience leading cross-functional engineering teams to deliver complex, large-scale cloud infrastructure and machine learning products. Adept at bridging the gap between business strategy and deep technical execution. Expert in managing multi-million dollar portfolios, mitigating architectural risks, and optimizing Agile/Scrum lifecycles to accelerate time-to-market.

Core Competencies & Technical Skills Matrix

Domain / Core Expertise	Technologies, Toolsets & Frameworks
Cloud & Distributed Systems	AWS (EC2, S3, RDS, Lambda), Azure, Docker, Kubernetes, Microservices Architecture
Program & Agile Management	Jira Portfolio, Confluence, Asana, Scaled Agile Framework (SAFe), Scrum, Kanban
Data & AI Infrastructure	Python, SQL, Apache Spark, TensorFlow pipelines, Data Warehousing (Snowflake)
Governance & Strategy	Cross-functional Alignment, Risk Mitigation, OKR Mapping, Vendor Management, Budgeting

- Professional Experience
- Principal Technical Program Manager — NextGen Tech Solutions

2023 – Present

 - Directed the migration of legacy monolithic data suites to a distributed AWS Kubernetes microservices mesh, reducing infrastructure costs by 22% (\$1.4M annualized savings).
 - Spearheaded a cross-functional program involving 5 engineering teams (45+ metrics-driven personnel) to ship a core real-time predictive AI pipeline ahead of schedule.
 - Established structured risk tracking frameworks that identified critical dependencies early, cutting production launch delays by 40%.

Senior Technical Program Manager — Apex Cloud Systems

2019 – 2023

 - Orchestrated international product feature delivery pipelines using Agile metrics, boosting feature deployment velocity by 35% through streamlined CI/CD sprint mechanics.
 - Managed the technical integration lifecycle of 3rd party enterprise data warehouses, driving business-to-engineering API mapping blueprints alongside strict SLA frameworks.
 - Coordinated executive engineering OKR workshops across global divisions to secure technical alignment on major system refactoring targets.

Selected Program Portfolio & Strategic Impact

Program Strategy & Scale	Technical Execution Highlights	Quantifiable Business Impact
Global Cloud Scalability Mesh Scale: 10M+ Daily Active Users	Engineered multi-region failover protocols, cloud API rate-limiting rules, and multi-tenant database clusters.	Achieved 99.99% system uptime SLA target; lowered high-load response latency by 150ms.

Enterprise Data Security Compliance Scope: GDPR / SOC2 Protocols	Automated vulnerability scanning routines, IAM credential rotating keys, and data-at-rest tokenization pipelines.	Passed independent SOC2 audits seamlessly with zero critical findings; mitigated enterprise trust risks.

Education & Professional Credentials

- **B.S. in Computer Science** — Western State University
- **Project Management Professional (PMP)** — Project Management Institute (PMI)
- **Certified Scrum Master (CSM)** — Scrum Alliance
- **AWS Certified Solutions Architect – Associate**
